Wheat started firm at yesterday's closing figures, became easier for a minute or so and then became comparatively strong and kept on the rise for over an hour. At the end of that time September had advanced to 65%, as compared with 63c bid at the close of the day before. December did not follow September further at that time, than to the extent of ½c, reaching 62%c when September was 63%c, and going no higher during the latter's further ½c improvement. It was evident from that the extra strength in the nearer delivery proceeded from some slight misgivings as to the sufficiency of receipts in the near future. Chicago received 259 cars, compared with 384 a year ago. Only one car of to-day's receipts was good enough to be inspected contract grade, but it will of course be the interest, pleasure and duty of the elevator people to scour, blow and polish the remainder until it shall please the fastidious tuste of the inspectors. NEW YORK, Aug. 23.—There was nothing in the general situation, either in the political or the business world, to account for a reaction in stocks to-day. The market was simply over-bought, and was subjected to a process of testing, which, whether designed to do so or not, inevitably readjusts prices to the true basis of value. Yesterday's heavy profit-taking on the part of some of the powerful interests, who had been buying stocks in the confidence that they would advance in prices, led the way naturally to to-day's movement. It became evident at the opening that the estrong support of the leaders had been withdrawn. In the grankers even the outside buying, which has so nearly absorbed these stocks for some sime past, showed a marked diminution. There were even selling orders in the commission houses for outside account, thus showing that a large part of the recent public interest has been for speculative account. But the outside speculative public failed to show the aggressive confidence in their holdings recently manifested by the powerful ball clique. Neither had they the combined resources at their command to come in and support stocks on the declining market. The weakness of the hands into which large amounts of the grangers had fallen was made evident by the heavy stop-loss orders which were uncovered by the decline of 1½61½, in the grangers at midday. But the torrent of offerings at the low point fell to interests that were waiting and which effected a substantial raily on comparatively light transactions. The railroad list generally moved in sympathy with the grangers, the break in there putting an end for the time being to the strong upard movement which had set in some of the low priced Southern and Western railway shares. The early weakness was accentuated by the persistent sagging of Manhattan, which has fallen about 3 points on the day. Brooklyn Transit was also under revere pressure, and Consolidated Gas and some of the other specialties suffered from withdrawal of support. The early weakness of P NEW YORK, Aug. 23.-There was nothing in the Toledo received 222 cars of wheat yesterday, 178 The Omaha Bee estimates the Nebraska corn crop at 180,000,000 bushels. bing houses and is confined to somewhat conservative limits.

The most encouraging feature of the market is the trading in print cloths and their situation. The milis which have shut down for two weeks, and those which are shut down for varying periods between now and October 1, will relieve the market of a considerable amount of stock now held in manufacturers' hands. Extras are much firmer on account of this. Bids for 64 squares at 2c are not so quickly considered as they were. Contracts are hard to obtain at this price. Odd goods are in good shape. There is some strengthening noticed in the market for wide sheetings, but this is not sufficient to influence prices. Export goods are in steady request, with fair shipments reported. Coarse colored cottons are quiet and featureless. Printed cottons show no change.

OF INTEREST TO STOCKMEN OKLAHOMA CROP REPORTS ARE MOST ENCOURAGING.

From No Other Section of the West Are the Reports of Such Glowing Character as From There -Stock Yards Gossip.

> From no other section of the West are there coming so many glowing crop re-ports this year as from Oklahoma. All agree that such crops were never before raised there, C. P. Rock, of Stillwater, O. T., who was a visitor at the yards yester-day, says: "Corn is fine, grass good, wheat of corn and cottonseed, and the indications are that more cattle will be fed in the territory this winter than ever before.

> "Corn will make only half a crop around Shubert, Neb.," said L. M. Weddle, who was here yesterday with cattle. "And the indications are that fewer cattle will be fed with us this season than last, as corn will be higher and young cattle are selling above the safety line.

As has been expected, Southern Texas cattlemen have already turned their attention to the Cuban cattle market. The San Antonio Express says: "Colonel Ike T. Pryor returned yesterday from Galveston where he went to look after a shipment of cattle to Cuba. He is of the opinion that if the tariff is reduced on cattle shipped to the Cuban market that it will prove a very profitable and regular market for Texas cattle, but thinks the present tariff the same as that placed there on South American and Mexican cattle, \$6.00 per head, is a discrimination against the United States and especially Texas cattle."

The mule trade is opening up very well and a fairly active movement in them is looked for this fall. Yesterday A. G. Barew, of Lake Charles, La., took out a shipment of mules; Peter Paul, of Richmond, Va., also got a shipment, and A. B. Murry, of New Iberia, La., is here after mules,

There were very few choice natives in yesterday. There was one lot here, however, worthy of more than a passing notice. It was seventeen grade Shorthorn steers, brought in by Isaac Williams, of Brownsville, Neb. They were his own feeding, smooth and fleshy. They averaged 1.289 pounds, and were sold by Elmore & Cooper at \$5.30, the highest price of the day. Eastman got them for the export trade.

"The outlook for the cattleman was never better in Ray county," said William Duist, of Miltonvale, Mo., yesterday, who was here after stockers. "There is plenty of rough-ness and the corn crop promises to be a fine one. Stock is doing well and there will be a good many cattle fed in our county this winter."

"Miami county, Kas., is in much better condition this year than last." said S. R. Price, who was a visitor at the yards yesterday. "Corn is fine, grass good and a big hay crop has been secured. And stock is healthy and the indications are that more cattle will be fed in our county this season than the past one."

The dipping vats for cattle and disinfecting pens built by Atterberry & Co., near Mammoth Springs, Ark., on the Missouri line, were completed yesterday, and Dr. R. P. Steddom has been sent there by Colonel Albert Dean to superintend the dipping at that point.

M. Fleschman, of Detroit, Mich., was here yesterday looking over the market and studying it with a view of getting his choice cattle here. Packers got here yesterday 5,300 hogs and

Verbi's "House of Repose." From the London News.

From the London News.

The "House of Repose for Musicians," founded by Sig. Verdi, is now almost finished. It is nearly three years since the first stone was laid. It is situated in the Piazza Michelangelo Buonarrott, outside Porta Magenta, Milan. No exterior sign shows that the house is Verdi's work, and he ordered the architect, Boito, to avoid all external pomp, while preserving an elegant simplicity. Inside it is far grander than outside. It is destined to house 100 musicians—sixty men and forty womenduring the last years of their lives. There is a central hall for meetings and concerts, two open terraces, an oratory and an infirmary. Verdi wished that the house should not bear his name, but the Milan people always call it "Casa Verdi."

A good cry is beneficial to a woman. Crying does not consist merely in the shedding of tears, but includes so general and wide spread an action of the muscles that the whole body is convulsed and the blood pressure in the brain is much reduced.
